

**What the invention claimed is:**

1. A movable positioning holder of storage rack comprising:  
several holders on the storage rack, said holder further consists of a  
flank board, a hook joint stretches from top center of said flank board  
5 and is bent backward, a vertical supporting board on the front center  
of said holder, a sucking disk fixed onto said supporting board.

2. The movable positioning holder of storage rack recited in  
claim 1, wherein said flank board being in wrapping semicircle shape  
on each side.

10 3. The movable positioning holder of storage rack recited in  
claim 1, wherein a hole located on top of said supporting board, a  
stopper locates on the bottom of said sucking disk and passes through  
said hole to reach the bottom of said supporting board.

4. The movable positioning holder of storage rack recited in  
15 claim 1, wherein two frame stems locates on the hanging location of  
said holder, a horizontal rod links between said two frame stems, said  
hook joint of said holder hangs on said horizontal rod, two flank  
boards stick on the surface of said two frame stems.

5. A movable positioning holder of storage rack comprising:  
20 several holders on the storage rack, said holder further consists of a  
flank board, a hook joint stretches from top center of said flank board  
and is bent backward, a vertical supporting board on the front center  
of said holder, a hole on said supporting board.

6. The movable positioning holder of storage rack recited in  
25 claim 5, wherein said flank board being in wrapping semicircle shape  
on each side.

7. The movable positioning holder of storage rack recited in  
claim 5, wherein said hole being for a screw to pass through.

8. The movable positioning holder of storage rack recited in claim 5, wherein two frame stems locates on the hanging location of said holder, a horizontal rod links between said two frame stems, said hook joint of said holder hangs on said horizontal rod, two flank  
5 boards stick on the surface of said two frame stems.
